Energy Medicine

White Cloud Institute's Energy Medicine Certification Program is a two-year course of study. Coursework includes ancient healing methods and current scientific research. The program brings students closer to fulfilling their longing for contact with the spiritual world and to integrating that awareness into daily life. Healing becomes incidental to a greater understanding of life on this planet.

Students experience their own core healing abilities in order to reintroduce natural soul-level healing to their families and communities. Find more joy and vitality by evolving beyond a third-dimensional reality into a consciousness-based reality. This program teaches lifelong practices which enhance both health and connectedness to the universe.

Personal growth, essential to the development of healing, is an integral part of the program. Students experience the support and comradery of the group as well as guidance in expressing their professional development. The program allows for surprises, deep introspection through journey work and meditation, and the discovery of our individual evolution and the contribution we each bring to the world. Along the way we learn to appreciate who we are and how we can bring more compassion into our lives.

The program schedule is paced to allow each student's healership to evolve with practice and time to integrate new information. The foundational course, Energy Medicine I, is taught as a five-day intensive for those travelling from out of town. Skills workshops are all offered over two days to accommodate residents and visitors alike. Class descriptions follow.

Energy Medicine I

This course provides a foundation for understanding the Human Energy Field and strengthens your understanding of how our energetic bodies move through time and space to assist us in our relationships, our health and our spiritual evolution. This information may be applied to any healing modality and is essential in developing a healing plan. A combination of lecture, guided hands-on experience and research. You will learn; how to read an aura, about quantum physics and healing, long distance healing and prayer, the intricacies of the human energy field and its' relationship to health and disease, how to work with chakras and know what you are feeling, healthy boundaries, how culture and beliefs affect healing, and what is Healing? We will discuss the emerging archetypes of healing. An invaluable course for developing a deeper understanding of your own energy and how to respond to clients. You will also learn how to receive clearer guidance and increase your high sense perception.

Energy Medicine II

This course expands on the work completed in Energy Medicine I. Students are expected to have mastered level I skills and be ready to move into more advanced techniques of healing and meditation. This course will discuss, in more depth, the major models of healing, the hara dimension of the energy field, and the level of intention. This course explores individual healing styles within the group, using case studies to refine our diagnosis and treatment decisions.

Skills Workshops

These two-day seminar focuses on your practice sessions with clients and is designed to give specific feedback to each individual. New techniques are taught to add to your practice during this session. This is a time to come together and share case studies and insights gained through practice. Also, to receive new information about healing techniques. Individual feedback from the instructor will help to focus your healing practice. We will be visioning your unique model of healing for the world.

Projects and Case Studies

In the second year of the program, students choose a project to investigate for their healing work. There is also a case study, in which students will work for ten sessions with one client to deepen their skills in energy healing.

Energy Medicine I - March 27-29, 2009

21 Contact Hours, and 6 hours of Ethics

Energy Medicine II - June 6,7 2009

21 Contact Hours

Skills Workshops - Sept and Dec, 2009

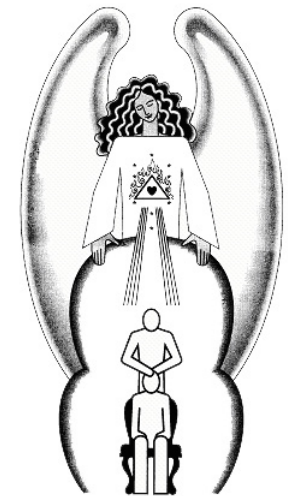

Case Studies - March 2010

Projects and Graduation - June 2010

School Founder and Instructor

Caryn Boyd Diel has a full time Energy Medicine practice in Santa Fe which incorporates 27 years of study in the areas of counseling, body-work and energy healing. Graduate of the Barbara Brennan School of Healing and a Universal Healing Tao Instructor, she moves fluidly between dimensions to assist clients and students to find new direction and wellness. Caryn enjoys teaching others how the human energy field contributes to health and the evolution of consciousness. She combines cutting edge quantum physics with ancient Taoist practices into her ever expanding curriculum.

Please contact us for an application packet. This course program is approved for Continuing Education for Nurses and Massage Therapists. NCBTMB #284826-00
